Alimentation sans interruption TRIO-UPS-2G/1AC/24DC/5

code: A6963

Alimentation de secours A6963, modèle TRIO-UPS-2G/1AC/24DC/5 avec batterie A7963. L'alimentation est conçue pour être montée sur un rail DIN de 35 mm dans un boîtier d'enregistrement de données MP033 et MP034. Il contient deux modules - UPS et batterie. L'alimentation est livrée désinstallée dans l'emballage d'origine du fabricant.

The backup power supply Phoenix Contact TRIO-UPS-2G/1AC/24DC/5 combines a mains power supply and a UPS module for 24 V DC loads. The unit is designed for DIN rail mounting and automatically switches to the connected external battery in the event of a mains failure.

The backup time is not fixed and depends on the battery capacity used and the load current. As a guideline, approximately 2 hours of operation can be expected with a 12 Ah battery at a 5 A load (the actual value may vary depending on battery age and system efficiency).

Main parameters:

- input voltage 100–240 V AC
- output 24 V DC / 5 A (BOOST up to 7.5 A)
- connection of external 24 V VRLA batteries (approx. 1.2–12 Ah)
- transfer to battery in case of mains failure < 75 ms
- installation on 35 mm DIN rail, push-in terminals
- example of backup time: ~7 h / 1 A (12 Ah), ~2 h / 5 A (12 Ah)

For mounting to the MP033 or MP034 please order: 1pc A6963, 1pc A7963, 1pc MP035 rail.

A7963 battery is not included, must be ordered separately.
