

Multilogger - thermomètre à 4 entrées thermocouple

code: M1200E

M1200E is a battery operated datalogger that allows to monitor the actual measured values on the device display or to work with historical data in Comet Vision, where you can create table charts, PDF export, MS EXCEL.

The device is designed for measuring and recording with 4 inputs for thermocouples K, J, S, B, T, N.

Included is traceable calibration certificate in accordance with EN ISO/IEC17025.
